

Murrietta Jobs Senior PCB Designer

Full Time	Anaheim, CA	Job posted 10/15/07
-----------	-------------	---------------------

Position: Sr. PCB Designer

Reports To: Design Manager

Area of Responsibility: All areas of PCB design with extensive experience in Mentor Graphics and/or Pads Power PCB. Direct client contact.

Responsibilities:

- Look at all areas of the design to ensure manufacturability.
- Understand all terms involving PCB design to ensure clear communication between customers & front end engineering.
- Review all customer data.
- Ensure the customer has provided us with all necessary documentation & criteria to begin the design review.
- Prioritize designs to ensure timely delivery to manufacturing and/or customer.
- Contact customers as necessary to clarify data, parts list, manufacturability, etc.
- Maintain clear communication with front-end engineering and other departments.

Education and Experience Requirements:

- Excellent communication skills & customer service skills required, as well as a thorough understanding of DFM.
- Must have the ability to work in a fast paced environment.
- Must be able to multitask.

Murrietta Circuits is an Equal Employment Opportunity Employer.
